Education

University of Calcutta — Kolkata
Bachelor of Arts — *Aug 2021*

Scaler Academy — Kolkata
Full-Stack Development — *Dec 2024*

Technical Skills

Languages: TypeScript, JavaScript, Java, Go, Python, SQL
Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Spring Boot, Redux, React Query, Tailwind CSS
Databases, Cloud & Tools: PostgreSQL, MongoDB, MySQL, AWS, Azure, Docker, CI/CD, Git, Postman, NoSQL

Experience

Software Development Engineer — Sep. 2025 – Sep. 2026
Ocube Services — *Remote*

- Built full-stack features across React.js and Next.js on the frontend, and Node.js, Java, and Spring Boot on the backend, contributing across the complete development lifecycle.
- Developed **15+** reusable React.js and Next.js modules within a micro-frontend architecture, reducing development time for new features by **30%**.
- Developed and integrated **20+** REST APIs using Node.js, Java, and Spring Boot, implementing business logic, validation, error handling, and PostgreSQL database operations.
- Collaborated with cross-functional teams including product, QA, design, and engineering to deliver features, resolve issues, and improve application quality and maintainability.

Frontend Developer Intern — Apr. 2025 – Aug. 2025
Nura9 Technologies — *Remote*

- Developed 10+ responsive React.js applications, improving Lighthouse performance scores to 95+ while reducing page load times by **25%**.
- Integrated 10+ REST APIs in collaboration with backend engineers and partnered with QA to reproduce and resolve application issues, improving application stability.

Projects

Geofence Vehicle Tracking System | *React.js, TypeScript, Go (Gin), PostgreSQL, Docker*

- Built a full-stack geofencing platform using React, TypeScript, Go (Gin), PostgreSQL, and Docker for geofence, vehicle, and real-time alert management.
- Implemented Leaflet-based mapping, RESTful APIs, and WebSocket notifications with automatic reconnection for live vehicle entry/exit tracking.
- Developed REST APIs using Go (Gin) for vehicle registration, geofence management, and violation tracking, backed by PostgreSQL for persistent data storage.

Cross-Chain Messenger DApp | *Next.js, TypeScript, Hyperlane, React Query, Tailwind CSS*

- Built a cross-chain messaging dApp using Next.js, TypeScript, Hyperlane, and MetaMask, enabling secure communication across EVM-compatible blockchains
- Developed a modern, responsive UI with Tailwind CSS and optimized asynchronous blockchain interactions using React Query to enhance performance and user experience.

BookmyShow Clone | *React.js, Node.js, Express.js, MongoDB, JWT*

- Developed a full-stack movie ticket booking platform using React.js, Node.js, Express.js, and MongoDB, building REST APIs for user authentication, movie listings, and booking workflows.
- Implemented secure authentication and role-based authorization using JWT, bcrypt, and middleware, ensuring protected access to booking workflows.
- Developed a responsive, state-managed frontend with React.js and Redux, integrating RESTful APIs for real-time movie listings and ticket booking.
