sneha1995sarkar25@gmail.com

Skills

- **Programming Languages** : CSS, TypeScript, HTML, Javascript, Java, Go, Python
- **Libraries and Frameworks** : React, Redux, Express.js, Node.js, Next.JS
- **Tools** : MongoDB, SQL, Git, CI/CD, Azure, postman, MySQL, AWS, SQL Server, Docker

Experience

Software Developer 1 Sep 2025 - Present

Onov8

- Developed and maintained enterprise-scale **React.js, Next.js** and **TypeScript** applications using a **micro-frontend** architecture.
- Built reusable components, dynamic forms, data tables, filters, and role-based features while ensuring responsive and accessible user interfaces.
- Integrated and optimised **20+ REST APIs**, collaborating closely with backend engineers to deliver scalable business workflows.
- Debugged and resolved production issues involving API integrations, state management, performance bottlenecks, and complex frontend business logic.
- Refactored legacy components into reusable modules, reducing code duplication and improving maintainability across multiple business modules.
- Worked with **Git-based workflows**, **Docker**, **CI/CD** pipelines, and multiple deployment environments to support feature releases and bug fixes.

Frontend Developer Intern Apr 2025 - Aug 2025

Nura9 Technologies

- Developed and optimized **10+** responsive UIs using **React.js**, **Redux**, and **Tailwind CSS**, improving page load times by **25%** and reducing re-renders by **15%**.
- **Collaborated with designers and backend engineers** to integrate **10+ RESTful APIs (Axios, Fetch),** improving feature delivery speed by **20%**.
- Improved UI/UX through accessibility and performance optimizations, achieving **95% Lighthouse accessibility scores** across key modules.
- **Boosted app stability** by partnering with QA to resolve **50+ cross-browser and device issues**, reducing average bug resolution time by **30%**.
- Built **10+ reusable React components** from **Figma** designs, reducing development time per feature by **20%**.

Projects

Geofence Vehicle Tracking System

https://geofence-frontend-pi.vercel.app/

Frontend Repository (Private) | Backend Repository (Private)

- Engineered a full-stack geofencing platform using **React, TypeScript, Go (Gin), PostgreSQL, and GORM** for managing geofences, vehicles, and real-time alerts.
- Developed an interactive map interface with **Leaflet** for polygon-based geofence creation, vehicle tracking, and location visualization.
- Implemented **WebSocket**-based real-time notifications for vehicle entry/exit events, including automatic alert broadcasting and reconnection handling.
- Designed RESTful APIs and modular backend architecture with repository and service layers for geofence, vehicle, alert, and violation management.
- Containerized the application using **Docker**, enabling consistent local development and deployment across frontend and backend services.

Built with: React, TypeScript, React Query, Tailwind CSS, Go (Gin), PostgreSQL, GORM, Gorilla WebSocket, Leaflet, Docker.

Cross-Chain Messenger DApp

crosschain-messenger-one.vercel.app

https://github.com/sneha619/Crosschain-Messenger

- Built a cross-chain messaging decentralized application using **Next.js (App Router), TypeScript, and Hyperlane**, enabling secure communication across EVM-compatible blockchains.
- Integrated **MetaMask** for wallet authentication and transaction signing, providing a seamless Web3 user experience.
- Developed a responsive, accessible interface using **Tailwind CSS, shadcn/ui, Radix UI, and Framer Motion** for modern UI interactions.

- Optimised asynchronous blockchain interactions and API state efficiently using **React Query**, improving data consistency and user experience.

Built with: Next.js, TypeScript, React Query, Tailwind CSS, shadcn/ui, Radix UI, Framer Motion, MetaMask, Hyperlane.

Achievements

- **Scaler Certifications:** High-Level Design, DSA, React, JavaScript, SQL & MERN
- **Creative**: Awarded multiple times for artwork at ICCR, Kolkata, among 100+ participants.

Education

Scaler 2024
Specialized in Software Development & Problem Solving
(Frontend & Backend)

University Of Calcutta 2020
BA
